

HL-L460S Liquid/Sauce Packaging Machine

Product introduction:

- The machine adopts advanced computer touch screen operation, man-machine interface, simple and convenient operation.
- International well-known brand PLC control system, equipped with imported electrical components, can automatically complete bag making, measuring, filling, inflating, sealing, cutting, counting, coding, at the same time according to customer requirements with punching.
- Intelligent photoelectric control device ensure the complete pattern of packaging and bag making. The bag is controlled by performance, convenient adjustment and accurate detection.
- 304 stainless steel is used for the whole contact material parts and chassis, which meets the food and drug hygiene licensing standards.
- The filling method adopts high precision stainless steel cam rotor pump, which is quantitatively manufactured by imported servo drive motor. The operation is simple and the measurement is accurate.

Technical parameters:

Model	HL-L460S
Bag Length	80-300mm
Bag Width	80-220mm
Packing Film Width	180-460mm
Packaging Capacity	50-2000ml
Packaging Speed	10-75 bags/min
Power	2.5Kw
Gas Source	0.65Mpa
Air Consumption	150L/min
Weight	600Kg
