

Flat Semi Automatic Label Applicator Machine MT-60M

Semi Automatic Label Applicator Machine for plane surface MT-60 is for various kinds of products labeling, there is a large adjustable range for the bottle and lid. Suitable for all kinds of products which are flat.

The machine adopts high precision intelligent electric eye and extremely reliable programmable logic controller (PLC) for label peeling, label outputting and labeling. Adhesive labels will be adsorbed to the labeling head by air pressure, and then will be labelled on the item. And this machine is equipped with a coding machine, and is able to finish labeling and printing at the same time. Click to view our Code Printer Machine.

After you putting the objects on the instructed position, the machine will finish the labeling process.

Application

- Labeling on the flat surface of various items
- Labeling on the flat surface of square bottles filled by cosmetics and Drugs
- Labeling or anti-counterfeit labeling on the flat surface of various kinds of boxes
- Labeling on the surface of LCD screen, electronic components, and is widely applied in many industries, such as cosmetics, daily chemical, electronics, food and medicine.
- Features
- Labeling efficiency is up to 60 pcs/min
- Labeling head is greatly adjustable in order to cater for various needs
- Excellent effect can be delivered for labels with no wrinkles and no bubbles.
- Considerable choice as using reputable PLC and sensor components for the most dependable performance we can deliver.
- Could be working independently or coupled with production line.
- Modular design, convenient maintenance and low cost.
- Equipped with a coder to print production lot numbers and dates, and others.

Specifications

Model	MT-60M
Output	50pcs/min
Precision	± 1mm
Applicable bottles size	Height: 180mm
Label roll	External diameter: 300mm; inner diameter: 75mm
Label size	10mm -120mm
Power	120W
Voltage	220V 50Hz/110V 60Hz
Machine size	920x310x590mm (LxWxH)
Machine weight	35kg
