

SP-IS Induction Sealing Machine

Induction Cap sealer adds security and value to your products, it provides an effective means of tamper-evidence, improves shelf life and eliminates leaks. Once caps with foil liners are tightened to the bottle, the non-contact heating process is accomplished by the high frequency induction field, with almost no heat transfer to product.

Features

- High efficiency water cooling ensures long runs without overheating
- IGBT technology provides high efficiency, low consumption and long service life
- Meets cGMP requirements
- Universal coil capable of sealing a wide range of closure diameters
- Lightweight design for easy mobility
- Fast and easy setup
- Safe, reliable, compact and lightweight
- Stainless steel frames and cabinets

Technical Specification

Model	SP-IS
Capping speed	30-60 bottles/min
Bottle dimension	Φ 30-90mm H40-250mm
Cap dia.	Φ 16-50/ Φ 25-65/ Φ 60-85mm
Power Supply	1 Phase AC220V 50/60Hz
Total power	4KW
Total Weight	200kg
Overall Dimension	1600×900×1500mm
