

VFL-20X Automatic (Gravity) Liquid Filling Machine

VFL-20X Automatic (Gravity) Liquid Filling Machine is the most advanced rotating filling machine for liquid in our country. It is suited for gas (carbonated) products. Like beverage/bottle water, juice, alcohol, sauces, edible oils, especially for the chemical, emulsion, pesticide, etc. The filling volumes range is 30ml - 1000ml, the max filling speed can reach 7000 bottles/hour.

Features:

1. VFL-20X Automatic (Gravity) Liquid Filling Machine has applied patent. Patent Number is 200420080670.0.
2. Adopts international famous brand electrical and pneumatic components.
3. Automatic controlled by computer (PLC), touch screen control panels, and high-quality stainless steel frames conforming to GMP.
4. Especially the machine filling speed very fast, filling without any leakage.
5. Easy operating, little noise, long service life element, high reliability, metering regulate accurate.
6. It's the best choice for large or medium scale enterprise.

Technique Parameter:

Power Supply	AC 220V; 50Hz
Power	1.5 Kw
Production Capacity	1000ml 7000bottles/hour Maximum (take water for test)
Container Size Range	Height 80mm—250mm Diameter: 40mm—100mm
Filling Volume Range	30ml—1000ml
Error Range	$\leq 250\text{ml}$ $\pm 2.0\%$ $\geq 250\text{ml}$ $\pm 1.5\%$
Machine Dimension (L×W×H)	2000mm×1250mm×2200mm
Machine Weight	1200Kg
