

## Automatic Half Tray PE Film Shrink Wrapping Machine LK-BT-20

This machine mainly use for bottle and cans packing processing, it is 2 in 1 automatic packing machine, can tray carton forming, packing, film wrapping then shrinking.

1. Simple and beautiful appearance, novel structure, unique and easy maintenance. Pneumatic expansion support film coil, electronic induction film transmission, smooth film delivery, fast and rapid film change.
2. Unique "Micro Vibration" bottle method (patented technology), can make the product smooth division, to avoid the phenomenon of squeezing bottles.

### Technical Parameter:

Model	LK-BT-20
Capacity:	18-22Packages/Min
Packing form	2*2, 2*3, 3*4、 4*6 (or appointed packing spec)
Applicable container shape	circular container, PE bottle, container outer diameter: $\Phi$ 40~ $\Phi$ 110, height: 60~340mm circular or quadrate container.
Total power charge	27kw
Machine size	16590 (L) ×3840 (W) ×2614 (H)
Operating air pressure	0.6~0.8Mpa 60L/min
Thickness of shrink film	0.06-0.12mm
Conveyor height	according to fills Production line (Adjusting scope 200mm)
Width of film roll	≤600mm
Diameter of film roll:	≤450mm
