

Round Bottle Positioning Labeling Machine

Apply to petro chemical, medicine, healthy care product, foodstuff, chemical and ect. any other whole circle label industrial round container products. Selection Ink jet printer, ink writer can print date of production date, batch number, validity date and ect. any other information. One machine can be used on different diameter, height of items for automatic labeling.

Features

1. Achieving high-speed labeling.
2. Can labeling one piece or two pieces according to setting.
3. The container be positioned by three sides, can achieve high precision labeling, not influenced by bottom.
4. Adopt holding label, without any bubble when labeling plastic label.
5. Whole Electronic control system control by PLC, adopt Chinese tough operation, it's quite convenient and clear.
6. Whole SS round angle machine cabinet, easy for clean, with good appearance.

Technical Parameters

Powder supply	220V \pm 10% 50Hz
Label Speed	200 bottles /min
Labeling precision	Bottle's Axle Position Error \pm 0.5mm ; front and rear height deviation(first one and last one) \pm 1.0mm
Material size	Φ 20-90mm
Operating environment Relative temperature	-20~50°C
Operating Relative humidity	15-95%
