

Desktop Round Bottle Labeling Machine MPC-10300

This labeling machine is specially designed and specific, and is dedicated to labeling round bottles provided by customers. After being familiar with this equipment, it can be applied to the round bottle labeling of other products.

Introduction

The MPC-10300 is specially designed and specific, and is dedicated to labeling round bottles provided by customers, improving production efficiency. It is suitable for products that require labels to be attached to circumferential and conical surfaces, and is widely used in food, medicine, daily chemicals, electronics, hardware, plastics and other industries. Our labeling machines can improve production efficiency and reduce labor costs, making them the best choice for your business.

Specifications

Model	MPC-10300
Labeling accuracy	±1mm (excluding product and label errors), the adjustment level obviously affects the labeling accuracy
Labeling speed	20~100 pcs/minute, depending on product length and quality
Applicable products	diameter Φ25mm-Φ100mm, height Φ75-300mm
Applicable labels	width 25-100mm, length 20-285mm
Dimensions	1200×850×730mm L×W×H
Applicable power supply	220V 50/60Hz
Machine weight	about 150kg
