

## MD-F80 Automatic Powder Filling Machine

This automatic powder filling machine is designed according to the national GMP standard, and this machine can form an assembly line with the bottle trimming machine, cap-giving and capping machine, labeling machine, and other equipment. This automatic powder filling and packing machine is suitable for food, medicine, daily necessities, and other industries to fill powdery materials. Such as milk powder, protein powder, cocoa powder, coffee powder, rice powder, solid drinks, and other powdery, ultra-fine powder materials.

### Features

Controlled by PLC, the touch screen maximizes the automatic powder filling machine's accuracy and stability of the whole machine frame made of stainless steel, contact materials such as food grade can be selected 316 stainless steel manufacturing, motor, cylinder, electrical accessories, pneumatic components, etc., are selected from well-known brands, but also can be specified by the customer brand. Can be applied to food medicine and chemical raw materials.

### Parameters

Production Capacity	10-30 cans/minute
Adaptation Specifications	10-1000g (changeover screw attachment)
Number Of Filling Heads	1 head (multiple heads optional)
Measurement Error	±0.5%
Power Supply	380V、50Hz/60Hz
Wattage	2.2KW
Overall Dimension	2000×1000×1980mm
Weight	Approx. 200kg
