

DZ(Q)-600L Vertical External Vacuum Packaging Machine

This packaging machine is an external-type vertical vacuum packing machine with a unique product construction design. It can be used directly on the users' own production lines.

It's a vertical external vacuum packing machine, adopting a unique product structure design and can be directly matched with user-provided production line. The working head can be adjusted freely according to the size of the package. It is controlled by a PLC system, with a many parameters for precisely controlled. It is easy to operate, and is an ideal equipment for vacuum packaging of large and heavy products in the food, medicinal, chemical, and rare metal industries.

1. Decent and strong sealing results are ensured both for plastic bags and aluminum bags of various sizes.
2. This machine is suitable for vacuum packaging or vacuum inflatable packaging of large volume objects.
3. The external structure is made of stainless steel, is easy to clean and corrosion resistant.
4. The working head can be lifted up and down freely with screw rod, which is stable and flexible, suitable for all kinds of packing materials.

Specifications

Model	DZ(Q)-600L
Sealing Length	600mm×2
Sealing Width	8mm/10mm
Compress air requirement	0.5MPa-0.8MPa
Maximun Vacuum	≤-0.08MPa
Power	1.5kW
Voltage	220V / 50Hz
Dimensions	750mm×600mm×1350mm
Weight	120kg
