

CGN-C Semi-Automatic Capsule Filling Machine

The semi automatic capsule filling machine is a special machine which is suitable for the medium, small pharmaceutical factory and hospital labs. It adopts programmable control system, touch panel operation, step-less transduction speed shift, and electronic counter. The machine can complete the actions of position, separation, filling and locking. The dosage is accurate and the operation is very easy to learn. The overall machine is made of stainless steel, and it is suitable for the capsules which filled with powder and grains.

Feature:

1. Controlled by step-less frequency conversion and pneumatic device, and it adopts electronic automatic counter.
2. Can finish position, separation, filling, locking of capsules.
3. Filling dosage is accurate, and it can fill grains or powder.
4. Modified design of drug hopper reduces time for dismantling and unloading of powder.

Parameters:

Model	CGN-C
Max. Output	10, 000- 20, 000 Capsules/Hour
Capsule Size	Suitable for filling capsule size 00#- 3 #
	(Need to exchange the spare parts/moulds accordingly)
Dosage Type	Powder/granular material
Power Supply	380V 50HZ 2.21KW (Can be made according to the client' s voltage standard)
Machine Size/N. W.	12 0 0 mm× 700 mm× 1600 mm Net Weight: 330 KG
Packing Size/G. W.	1600 mm× 1000 mm× 1700 mm Gross Weight: 500 KG
