

NFJ-150 Capsule Sorter Polisher

NFJ-150 Capsule Sorter Polisher is an advanced capsule polishing machine with sorting function. The whole machine is made of stainless steel. Fast connection of roller brush leads to disassemble easily and clean thoroughly. Frequency inverter controls the speed of the motor, so it can bear big start-up force and run stably and reliable. NFJ-150 Capsule Sorter Polisher is not only applied to polishing capsule, tablet and eliminating the static electricity, but also applied to ejecting empty capsule, light weight capsule, separated capsule and fragment. This machine is suitable for all sizes of capsules without changeovers.

Technical Parameters:

Model	NFJ-150
Power supply	220V/50Hz
Power	180W
Max. capacity	7000 capsules/min
Vacuum dust clearing	2.7m ³ /min
Compressed air	30Pa
Dimensions	900x600x1100mm
Weight	45kg
