

DZ-400Z Table Type Vacuum Packing Machine

This machine is a refinement-type external vacuum packaging machine and is provided with a special vacuum system and exhaust unit, without generating noise and contamination. It is especially applied in electronics, medical industry and other industries where there is a high requirement for clean, dust-free and bacteria-free workshops.

1. It's easy to operate the machine with PLC touch screen.
2. The shell of packing machine is made of stainless steel, suitable for various occasions and materials;
3. The packaging process is clear and the operation is convenient.
4. The vacuum system adopts imported vacuum generator, with the advantages of no noise and no pollution, it can be used in a clean room.

Specifications

Model	DZ-400Z
Sealing Length	400mm(Customizable)
Sealing Width	8mm/10mm
Maximun Vacuum	≤-0.08MPa
Compress Air Requirement	0.5MPa-0.8MPa
Voultage	220V / 50Hz
Power	0.6kW
Dimensions	680mm×350mm×280mm
Weight	22kg
