

## ***JKF-03 3D Baked Powder Blush Extruding and Forming Machine***

This machine is designed for extruding and forming 3D baked powder and blusher

### **Features**

1. The speed and moving distance of Top and Bottom compact cylinder are adjustable.
2. Dual layer fabric rolling function.
3. With air cylinder to pressure material for filling.
4. Precise filling with servo motor to control the screw extruder.
5. Material matching before filling is driven by servo motor.
6. With vacuum sucking when compacting (to remove moisture and oil to effect quick baking).
7. With PLC control and touch screen to set parameters.

### **Technical Parameters**

Model	JKF-03
Outer Dimension	1130x910x1450mm (LxWxH)
Voltage	AC220V, 1P, 50/60HZ
Power	2.5KW
Air Supply	0.6~0.8Mpa, ≥900L/min
Output	12 pcs/min(acc.to formulas)
Tank volume	10L
Weight	500KGS
