

CS01 Side Loading Intelligent Integrated Case Packer

Colamark Case packer integrated Case feeder, Case erector, product insertion, Case closing in one machine. Optional card board and leaflet insertion, Camera Track and trace feature and outer case printing/labeling are available to maximize your investment. As space is always a concern on production floor, our All-In-One design case packer can offer multi-functions on single machine with synchronization of other Colamark upstream machines. Pick and place are driven by liner drive or your preferable robotic brand. Colamark is a partner of ABB, EPSON, FANUC.

CS Series is for side loading version.

Features:

- Fully equipped with sensors to make sure operation is correct.
- Case supply low alert, if cases are less than 5.
- Adhesive tape assembly will alert, if tape level is low.
- Product insertion verification. Equipped insert guide and case opening check.
- Optional carton serialization and track and trace before insertion. We can integrate with leading Track and trace solution provider.
- Optional board or leaflet insertion feature.

Technical Parameters

Speed	5 cases per minute
Case Size	250 - 600mm L x 150 - 400mm W x 180 - 400mm H.
	(Please confirm your case size with our engineering team)
Air Supply	0.5 MPa. 150 Litre per minute
Electricity	380V 3 phase, 50 Hz
Power consumption	6.5 kW
