

DR-2013T Ultrasonic Five in One Soft Plastic Tube Sealer Sealing Machine

DR-2013T Ultrasonic plastic tube sealer sealing machine is applicable to toothpaste, cosmetic, pharmaceutical, food, industry product and other soft tube sealing. Extensional organization of the machine is made of aluminium alloy and stainless steel.

This machine use for special-shaped tube sealing, date coding and trimming, it also can sealing wavy, straight and curve etc tube.

Main Features:

1. Easy to operate and maintain. Fast tube change-over, ultrasonic welding, cutting, batch No. stamping.
2. Stainless steel machine body, strong and beautiful, machine is small and light, easy to be located.
3. Tool head can be customized according to customer requirements. Can seal many size of tubes.
4. Ultrasonic Sealing Machine power source for the pneumatic, working steady, not easy to damage, customers can rest assured use.
5. Ultrasonic frequency can meet international standard, no harmful to human being or environment.

Technical Parameters

| Model | DR-2013T |
|------------------|--------------------------|
| Power supply | AC220V/50Hz or 110v/60Hz |
| Ultrasonic power | 2600W |
| Frequency | 15KHZ |
| Tube length | 50-250mm |
| Tube diameter | 10-50 mm |
| N.W/GW | 120KGS |
| Pack size | 550×650×1000mm(0.54CBM) |
