

## *Automatic Double-head Labeling Machine CTB-3600*

CTB-3600 double-head flat label machine is a powerful and easy-to-operate labeling device suitable for pasting various flat labels.

### **Introduction**

The CTB-3600 double-head flat label machine stands out in the flat label pasting field with its excellent performance and design. The double-head design enables simultaneous pasting of double-sided labels, significantly improving production efficiency; high-precision label pasting ensures product quality and meets strict production requirements. In addition, the features of easy operation and maintenance reduce usage costs and improve equipment utilization. Choose CTB-3600 and you will get an efficient, reliable and economical flat label solution.

### **Feature**

- Double-head design: equipped with two label heads, double-sided label pasting can be performed at the same time to improve efficiency.
- High precision: label pasting accuracy can reach  $\pm 1\text{mm}$ , ensuring the label position is accurate.
- High efficiency: label pasting speed can reach 20~80 pcs/min to meet different production needs.
- Wide range of applications: can be applied to the pasting of various flat labels, such as card labels, bottle cap labels, plastic labels, etc.
- Easy operation: friendly human-machine interface, simple and easy to learn operation.
- Easy maintenance: simple structure, easy maintenance, and reduced maintenance costs.

## Specifications

Model	CTB-3600
Labeling precision	±1mm (Errors of products and labels are not included.) and adjustment level will influence labeling precision obviously
Labeling speed	20~80 pcs/min. Depending on product length and quality.
Applicable product	samples provided by the customer.
Applicable label	rolled label provided by the customer.
Machine dimension	2270×750×1360mm (length×width×height).
Applicable power	220ACV 50/60HZ
Machine weight	165kg
