

Spiral Filling Machine FZX

Repackaging many kinds items, use multiple spiral packing weighing, work more evenly in the process BuKa material, but with various membrane unit work, using infrared reflection principle, induction block feeding, more convenient to operate.

Introduction

Repackaging many kinds items, use multiple spiral packing weighing, work more evenly in the process BuKa material, but with various membrane unit work, using infrared reflection principle, induction block feeding, more convenient to operate. In addition the machine adopts the multi-function packer heightening version can be separated into two different 2 - 100 grams, between grams can be arbitrary regulation. About 15 minute package - 20, precision around 0.2 g, depending on different items.

This machine is widely used in: All kinds of powder, tea, grain, grain, medicinal herbs, seeds, spices, monosodium glutamate, sesame seeds, salt, beans, rice, chemical raw materials, electronic components, hardware components, and so on.

Specifications

Model	FZX-1	FZX-2
Filling weight	1-50g	1-100g
Deviation	±0.2g	±0.2g
Scope	Irregular/Granule/Powder	Irregular/Granule/Powder
Speed	15-35 bags/Min	15-35 bags/Min
Precision	0.1-0.2g(basis on different material)	0.1-0.2g(basis on different material)
Bottle height	30-300 (MM)	30-300 (MM)
Bottle dia.	30-500 (MM)	30-500 (MM)
Voltage	220V 50HZ/110V 60HZ	220V 50HZ/110V 60HZ
Power	50W	50W
Dimension(L x W x H)	45x43x48CM	45x43x64CM
Net weight(kg)	27.5kg	27.5kg
