

Spray Liquid Filling and Sealing Machine

This spray liquid filling and sealing machine is mainly used for filling sticky liquids, capping lids with thin rods, and labeling adhesive labels for bottles.

Its main parts are filling machine, capping equipment and labeler, and these machines should adopt box packaging and container transport.

This spray liquid filling and sealing machine features quality control capacity, and accurate measurement.

Main Parameters:

Bottle Size	5~30ml
Production Capacity	2400~3600 bottle/hour
Accuracy of Package	0~2%
Finished Product Rate	≥99%
Power	4KW
Electric Supply	380V/50hz, 3phase
