

HY-NBBS Double Feeding Moxibustion Sticking Machine

Features

1. This machine works steadily and continuously, and is suitable for the production of various granules, powders and other warm paste products.
2. Full automatic bagging, photoelectric correction, no burr, fault forming.
3. The equipment can be configured with trippers according to different weights.
4. Adopting Panasonic PLC imported from Japan, the accuracy is improved and the stability of the equipment is high.
5. Intermittent sealing is better to ensure the beauty of sealing and avoid leakage.
6. This machine is easy to operate. PLC touch screen can adjust the packaging temperature and speed according to the packaging material, product thickness and length. Servo motor. Through the control of light, electricity and gas, the fault can be self diagnosed and displayed clearly. The operating system language can be Spanish, French, Korean, Russian, Japanese, Arabic and other local languages.
7. The whole machine is covered with stainless steel, with good appearance, easy to clean and durable. Low operation and maintenance cost.
8. Intelligent PLC temperature control.
9. The required number of automatic alarm reminders, the required number of automatic batching and stacking.
10. Free switching of product specifications

Technical Parameters

Equipment model	HY-NBBS
Use packaging materials	Non woven fabric back adhesive tape
Model specification	Length 5000 * width 900 * height 1600
Packing speed	30-40 shots / min, 3 tablets per shot
Maximum package size	300mm long and 180mm wide (the size and shape can be customized. This specification is for warm baby)
Minimum material specification	90 mm long and 70 mm wide; (the molding size and shape can be customized. This specification is a mini sticker)
Rated voltage v Power	AC380v. 4. 5KW 0-50Hz
Compressed air pressure	0. 5-0. 8 (Mpa)
Compressed air consumption	> 0.36 (m3/h)
Noise (DB)	60-70dB
Machine weight kg	1000KG
