

ZHF-160 Double Heads Ointment Tube Filler And Sealer

Tube filling and sealing machine is suitable for filling all kinds of pasty and high viscous fluid and for large diameter plastic and composite tubes and then internally heating tubes, sealing and printing lot number and date. It is used in the industries of pharmaceuticals, foodstuff, cosmetic and bond and so on.

ZHF-160 tube filling & sealing machine is provided with 2 filling heads and a set of double-branch tube feeding system.

Applicable to: plastic composite tubes, aluminum plastic composite tubes and metal tubes (optional)

Optional Devices

- ◆Externally allocated refrigerator
- ◆Special-shaped sealing devices (wave type sealing device, arc sealing device, T-shaped punching hole sealing device, metal pipe folding and sealing device)
- ◆Jacket and barrel heat preservation device
- ◆Blending device inside the barrel
- ◆Blowing and sucking type tube cleaning device
- ◆Nitriding device before and after filling
- ◆Automatically controlled material feeding device (pump)
- ◆Finished tube conveyor

Technical Parameters

- Operation speed : 160/min/(max)
- Filling volume : 1-300ml
- Filling precision : $\leq \pm 0.5\%$
- Suitable tube length : 50-240mm
- Suitable tube diameter : 10-50mm
- Power supply : 380Volt, 50Hz (220Volt, 60Hz)
- Power of hot-wind generator : 3Kw \times 2
- Consumption of compressed air : 1.2 m³
- Working pressure : 0.6 Mpa
- Capacity of hopper : 70L
- Dimensions : 2870 \times 1770 \times 2340mm
