

Vacuum Machine Sealers DZ-500T

Bench vacuum packaging machine with front sealing bar, made of stainless steel (AISI 304), equipped with digital panel and electronic volumetric sensor that assures a steady control of vacuum. The bigger chamber with rounded lid allows the packaging of products with max. eight of mm. 180 and the vacuum pump from 20 m³ / h. ensures high productivity.

Vacuum machines can be equipped with gas injection system (ATM). Each sealing bar is equipped with two nozzles which introduce gases in different quantities, so the machines are suitable for the packaging of one single use for each sealing bar. When ordering, it is possible to request a modification to the gas inlet system so as to be able to pack two bags per bar by entering the same quantity of gas for each package.

Parameters:

Model	DZ-500/T
Voltage (V/Hz)	AC 380/50 220/50 110/60
Motor power (W)	900
Sealing Power (W)	500
Ultimate Vacuum Pressure (Kpa)	1
Sealing Width (mm)	10
Chamber Dimension (L×W×H) (mm)	506×556×190
Vacuum Pump capacity (m ³ /h)	20
Material for Vacuum Chamber	SUS304
External Dimensions (L×W×H) (mm)	586×670×504
Net Weight (Kg)	Approx.92
