

ZS-2B Electronic Counting Machine

The ZS-2B Electronic Counting Machine adopts an advanced vibrating channel, an Oscillator with variable frequency speed, PLC intelligent touch screen control, optical fiber-sensitive headcount, system self-inspection, a fault indication alarm, and automatic shutdown.

According to GMP standards, the machine uses all stainless steel quality, which is a high-tech medical counting device integrated with the collective motor.

This machine belongs to the desktop type counting device with a reasonable design and compact structure.

The machine is easy to operate and efficient. It can be widely used to make tablets, capsules, soft capsules, and other drugs in various shapes and sizes.

Counting accuracy reaches advanced levels worldwide.

Technical Parameters

- Speed: 600-2000 pcs/min
- Application: Hard capsules, soft capsules, tablets, pills, etc.
- Control device: Touch screen
- Counting method: infrared detection
- Suitable size: Capsule model 00 # -5 #; tablet diameter 5-25mm
- Counting error: $\pm 0.3\%$
- Power: 500W
- Weight: 50kg
- Dimension: 735mm x 580mm x 720mm
