

Bag In Box Aseptic Filling Machine

Bag in box aseptic filling machine is a high productivity, easy to use, compact filling equipment, suitable for all kinds of cover aseptic bags, such as ITW and Hoffer. It can be used in food, medical, chemical and other industries to fill with milk, juice, carbonated drinks, chemicals and so on.

Explanation: The production capacity of the machine depends on the efficiency of the operator and the speed of the product delivery. The maximum speed is 4~5 bags per 20L bag (4~5 bags 5 gallons of bags, 8~10 bags of 2.5 gallons of bags). Modular design, it will be more easier and faster to make switching between different lid or package capacity. When replacing the different covers, only need to replace the corresponding clamping dies.

Technical Parameters

Product Capacity	4~5 bag/min
Dimension	1005mm(L)x1315mm(W)x1795mm(H)
Power Supply	220VAC,50Hz
Power	Max<150w
Compressed Air Pressure	6~8bar
Air Consumption	70 NL/min
Capacity deviation	±0.3%
