

XCJ-36 Suction Machine

XCJ-36 suction machine for tablet press is widely used for collecting industrial dust on the equipment and in the environment of industrial production, such as medicine, foods, chemical industry, etc. This dust collector can be matched with tablet press, granulator, pulverizer, counting machine, capsule filling machine and capsule polish machine in pharmaceutical industry.

Features

1. XCJ-36 suction machine is made of stainless steel and aluminum alloy that have good corrosion resistance and do not pollute absorbed materials, so most of these materials can be recollected for use.
2. This dust collector is manufactured conforming to GMP standard.
3. Filter adopts electromagnetically vibration dedusting, making it have strong suction capability.
4. Suction machine for tablet press can be operated reliably with low noise.
5. This dust collector is easy and convenient to maintain.

Technique Parameters

Type	XCJ-36 Suction Machine for Tablet Press
Motor (kW)	1.1
Inhale Vacuum (m ³ /h)	360
Max. Air Vacuum (Pa)	1950
Noise (V, Hz)	Less than 75
Weight (kg)	72
Overall Size (mm)	700 × 460 × 1030
