

HZGG500-4D Automatic Paste Filling Machine

Widely use for filling various kinds of liquid, paste, stickiness, sauce and paste with small grain. For example: beverage with fruit piece, honey, syrup, jam, peanut butter, sesame paste, tomato paste and chili paste, etc. This series is easy to be operation, clear, maintain and volume adjust, widely use for chemistry and oil filed. It can fill with different stickiness products.

Product features:

1. Adopting PLC and touch screen control, has the advantages of accurate measurement, advanced structure, smooth operation.
2. Contact 2 the machine and materials are high quality stainless steel, beautiful appearance and no environmental pollution, simple assembly and disassembly, easy cleaning, according to the GMP standard.
3. The linear atmospheric pressure filling, through changing the filling time to realize the different measurement.
4. Photoelectric sensors, proximity switches are used in advanced transmission sensory element, make sure no bottle filling, liquid level automatic control.
5. Replacing bottles of different shapes, do not need to change parts, convenient adjustment, strong applicability;
6. The world-famous brands of electrical and pneumatic components, low failure rate, stable and reliable performance, long service life.
7. Filling volume and filling speed adjustment is simple, the filling nozzle is provided with anti leakage device, ensure filling without drawing, no leakage.

Technical parameters:

Model	HZGG500-4D
Voltage	AC220V,50/60HZ
Power	0.8KW
Optional Filling Volume	30-100/30-300/50-500ML
	100-1000/200-1500ML
	300-2500/1000-5000ML
Production Speed	20-30PCS/MIN
Air Pressure	0.4-0.6MPA
Machine Size	2000(L)×1100(W)×1650(H)MM
