

Multi-Lane Back Seal Filling Packing Machine SL800

The scope of application:

Powder, liquid, paste and granular strip multi-column packaging, different materials need to use different filling device.

Main Features:

1. The automatic packaging machine can automatically complete the product quantitative measurement, automatic bagging, sealing, cutting, printing production date and other functions.
2. Servo motor driven heat sealing film, stable and reliable, high accuracy.
3. High sensitivity electric eye can automatically track the positioning of printing the cursor, packaging color of the packaging material; you can get a complete trademark logo.
4. PLC control can be easily set on the touch screen console, adjust the packaging parameters. Intuitive display of production information, and has a self-reported fault, since the shutdown, self-diagnostic function, the use of safe and simple, easy maintenance.

Optional Accessories:

1. Date printer
2. Flat mouth cut and easy to tear
3. Punching device
4. Set the package cut off

Optional Fill:

1. Screw powder head (powder)
2. Measuring cup particles (particles)
3. Electronic pump (liquid)
4. Piston pump (paste)

The technical parameters:

Model	SL800
Bag length (mm)	70-180
Bag width (mm)	35-90
Film width (mm)	Max.800
Number of columns	4-10
Production capacity (Bag/min)	120-400
Sealing method	Back seal
