

ZKS Series Vacuum Charger

ZKS series vacuum charger is currently the most advanced domestic vacuum conveying equipment, ideal and perfect vacuum conveying machine for powder material, granular material and powder granular mixture. ZKS series vacuum charger not only can automatically transfer all kinds of materials to hopper, packing machine, injection molding machine, grinder and other equipment, but also directly transfer materials to mixers (such as V type mixer, two-dimensional mixer, multi-dimensional mixer, bin blender etc.). It also can reduce the labor intensity of the workers and solve the the problem of dust overflow when feeding. It is the preferred equipment for pharmaceutical industry, food industry and other industrials.

Technical Parameters:

Model	Motor Power (KW)	Transfer capacity (kg/h)
ZKS-1	1.5	400
ZKS-2	2,2	600
ZKS-3	3	1200
ZKS-4	5.5	2500
ZKS-6	5.5	3200
ZKS-7	7.5	6000
ZKS-10-6	7.5	6000 (when transfer distance 10m)
ZKS-20-5	11	5000 (when transfer distance 10m)
