

Auger Powder Filling Machine CN-HZFB

The machine uses the spiral cutting, to achieve high-precision automatic quantitative and filling.

Introduction

The machine uses the spiral cutting, to achieve high-precision automatic quantitative and filling.

Applicable to fertilizer, additives, flour, milk powder, detergent, solid drinks, sugar, monosodium glutamate, compound spices (such as spicy fresh), Natural spices, seeds, enzymes, feed and other powder (powder, superfine powder), granular materials, quantitative packaging, quantitative canned.

According to your actual needs, you can also choose auxiliary like automatic feeding device to further improve the efficiency, quantitative accuracy and automation.

Specifications

Model	CN-HZFB
Max capacity	10-30 bottle/min
Dia. of bottle	φ20-150mm
Height of bottle	60-300mm
Power	0.8KW
Voltage	AC220V,50/60HZ
Dimensions	900x900x2000mm
Weight	280kg
