

Automatic Bottle Arranging Machine HHLPB

Suitable for automatic sorting of medicinal plastic bottles, replaced by manual operation, simple operation, stable performance, is the machine automatically unscramble bottle, electricity, gas integration equipment, widely used in pharmaceutical, food and other industries.

Features:

- Continuously variable transmission, easy to connect with other equipment line production.
- The device is equipped with a bottle-turning device to ensure that the mouth of the bottle enters the packaging line.
- Low consumption, no pollution, no noise.

Technical Parameters:

Bottles applicability	30-300ml Medical plastic bottle
Qualified rate of bottle	>99.8%
Power source	220V 50Hz
Power	0.33kw
Weight	300kg
Overall size	2200 x 11000 x 1210mm
