

Hyaluronic Acid Syringe Filling Sealing Machine

The machine is the combination of our latest design, which is suitable for filling plastic syringe. It can be used to handle materials from gel, paste to liquid.

The basic working process of the machine:

1. Loading the syringe
2. Filling from the bottom
3. Loading the cap
4. Screwing the cap
5. Unloading the finished product

Easy for using and operating, it can satisfy your demand of higher efficiency.

The main function is: Loading syringe-Filling from bottom-Loading cap-Screwing cap-Output.

It is easy to use but can meet your demand for higher production.

Technical Parameters

Filling volume	5-50ml
Filling speed	800-1500 pieces/hour
Air consumption	0.5Mpa, 8m ³ /h
Filling accuracy	± 0.1g
Power	2.5KW, 220v 50Hz
Machine Size	1600*1500*1800MM
