

VFFX-SP8-800 Vertical Form Fill Seal Machine

Stick pack machines are a specific type of vertical form fill seal machines which allow for the quick and efficient filling of stick pouches, which are ideally suited for coffee, drink mixes, and various liquids and gels. Additional specifications on sachet machines and vertical form fill seal machines in general are provided separately.

- # of Lanes 8
- Speed 240-360 bags per minute
- Laminated Film Width (mm) Max 800 mm (31.5")
- Laminated Bag Length (mm) 70 –200 (2.75" –7.87")
- Laminated Bag Width (mm) 45 (1.77")
- Painted frame or stainless steel construction
- Motor driven heat seal film pulling system
- Fiber optic Photoeye sensor to trace registration mark accurately
- PLC Control (Panasonic) system combined with color HMI for setting packaging parameters.
- Daily production output and self-diagnostic machine error can be viewed directly from the screen.
- PID temperature controller monitors heat sealing temperature within +/- 1°C
