

## DXD-380C All-servo System Flow Type Packing Machine

Horizontal pillow type biscuit packing machine is suit for packing the biscuit, moon cake, cake, bread, fast food noodles, soaps, frozen foods and similar product.

### Features:

1. All use the servo intelligent zed control, run with low noise, make comfortable environment;
2. Feeding, forming, filling and sealing the whole process is automatic, can carry through the pipelining directly, have high automatic operation.
3. Design with the humanoid, uses the industry's touch screen, intuitionistic shows parameter, man-machine overlapping exchange way operation, menu operation, easy to operate.
4. The horizontal sealing and the film is synchronization, the sealing is more reliable and artistic.
5. The length adjustment scope is extremely broad, suit for packing many kinds of products.

### Technical Parameter:

Machine Name		All-servo System Flow Type Packing Machine	
Production Capacity		35-130 bags/min	60-260 bags /min
Packing range	The length of bags	190-450mm	90-270mm
	Width	40-140mm	40-140mm
	Height	1-60mm	1-40mm
Gross Power		3kw	
Power Supply		220v	
Gross weight		700kw	
Overall Dimensions (L×W×H)		3500*1000*1500mm
