

Mini lab Rotary Granulator

The machine is small desktop type hydro rotary granulator; it can produce granule of various specs from powdery materials.

The machine is applied to trial manufacture or batch produce in small scale in lab, hospital Or science research institutions.

Features

- The machine is made of high quality stainless steel, meet the GMP standard.
 - Columniform granule, orderly and handsome.
 - Specs of the granule: diameter 0.8, 1, 1.2, 1.5 mm.
 - Small volume, light weight, works smoothly and low noise.
- Lower consumption of materials, the minimum consumption of lab materials is just 50g.

Technical Parameters

Output	1-5 kg/h
Granule diameter	0.8mm, 1mm, 1.2mm, 1.5mm
Cutting speed	0-130 r/min
Power	0.8 KW
Power supply	AC,220V/50HZ 1 phase or customized
Weight	22 kg
Overall size	350x300x550 mm
