

Horizontal Conveyor

Applicable for conveying of products with good flow ability. Also suitable for conveying bulk cargo, boxed or bagged products in medium size and weight.

Main Function & Features:

1. Food grade conveyor belt. Able to combine with other equipment to make a whole production line for continuous or intermittent automatic weighing and packaging.
2. Variable Frequency Drive (VFD) to adjust conveying speed for less energy consumption and lower cost.
3. Stable and smooth conveying to avoid the products from being damaged.
4. Low noise, suitable for quiet working environment.
5. Simple maintenance, easy disassembly and convenient for cleaning.

Technical Parameters:

Contents	Specifications
Body Material	SUS304
Conveyor Type	plastic steel chain / plastic net chain / belt / roller / stainless steel net belt

Conveyor Belt Material	POM / PP / PVC / PU
Conveyor Belt Width	custom-made per requirement
Machine Size	custom-made per requirement
Power Supply	single / 3 phase 220V/380V 50HZ/60HZ
Power Consumption	0.4KW / 0.75KW / 1.1KW / 1.5KW / 2.2KW
Upright Guardrail	D12 steel rod / aluminum (optional)
Conveying Speed	variable frequency drive (VFD)
