RL-100 Round Canister Labeling Machine

The Tabletop Round bottle labeling machine is a cost-effective round container labeling machine. Constructed of stainless steel and anodized aluminum, the unit is a durable yet portable machine. The labeler comes in a microprocessor controlled package that is easy to set up, change over and use.

The Round canister labeling machine has a maximum production speed of more than 100 containers per minute. This product is a smart choice for low-volume production, R&D projects, new product launches or when efficiency and equipment cost are key considerations. The labeler is a cost-effective round container labeler. Constructed of stainless steel and anodized aluminum, the unit is a durable yet portable machine.

Specification:

Model	RL-100
Motor power	0.8KW, AC 220V/50/60HZ
Label accuracy	±1.0
Speed	20-50/min
Applicable bottle diameter range	Φ20mm—Φ110mm
Applicable bottle height range	20mm—150mm
Applicable label height range	15mm—130mm
Machine size（L*W*H）	1150*960*760mm
Machine Weight	100kg
