

## ***SPX-2 Automatic Double Head Capping Machine***

SPX-2 Automatic Double Head Capping Machine is new production, developed by factory. It equips positioning plate for interval running, capped by double magnetic moment rotating heads. The machine has practicability in field of pharmacy, pesticide, chemical, and foodstuff. Its ideal equipment for bottle capping. Also applied to seal aluminum cap, anti-theft cap, screw-thread cap. High qualified ratio of cap handing and rotating (sealing). Plate positioning, convenient to change size, large range of adjusting. Bottle feeding and exiting fluently, frequency conversion control speed. Compact structure, easy operation and maintenance. Magnetic moment cap rotating, tightness may be adjusted freely, not damage the bottle and cap. Continuous operation, completing automatic production, saving time and improving benefit.

### **Technical Parameters:**

<b>Model</b>	<b>SPX-2</b>
Max. Production Capacity	2400 bottles/hour
Bottle Size	20-1000 ml
Capping Head	Double Head
Optional Screw Cap	Diameter 12-70 mm
Optional ROPP Cap	Diameter 16-36 mm
Capping Accuracy	> 99%
Noise	< 70 dB
Power	220V, 50Hz, 1.2Kw
Packing Size	2000*1000*1500 mm
Packing Weight	750 Kg
