

FK308 Full Automatic L Type Sealing and Shrink Packaging

FK308 Full Automatic L Type Sealing and Shrink Packaging Machine. The automatic L-shaped sealing shrink packaging machine is suitable for film packaging of boxes, vegetables and bags. The shrink film is wrapped on the product, and the shrink film is heated to shrink the shrink film to wrap the product. The main function of film packaging is to seal. Moisture-proof and anti-pollution, protect the product from external impact and cushioning. Particularly, when packing fragile cargo, it will stop flying apart when utensil broken. Besides, it can reduce the possibility of unpack and stolen. It Can be used with other devices, support customization

Main Function:

- ① Adopt L type sealing system.
- ② Front and back conveyor adopt brake motor to avoid product forward rush because of belt stop'inertia.
- ③ Advanced waste film recycling system.
- ④ Man-Machine interface controller, easy operation.
- ⑤ Packing quantity counter function.
- ⑥ High strength sealing integrated, sealing more fastness and exquisite.

Technical Parameter

Model	FK-FQL-5545	FK-RS-5030
Size	L1850XW1450XH1410mm	1640x780x1520
Packing size	W+H≤430 L+H≤550 (H≤120)mm	L1200xW450xH250
Sealing cutter size/Furnace chamber size	650x500mm	L1300xW500xH300
Packing speed	10-30 pcs/min	20-40 pcs/min
Net weight	300kg	200kg
Power	5.5KW	13KW
Power	1φ220V.50-60Hz	3φ380V.50-60Hz
Using air source	5.5kg/square cm	5.5kg/square cm
Maximum electricity	10A	30A
