

Vertical glue spray cartoning machine BCLZ50-02

This machine is mainly applied to the daily chemical, pharmaceutical, cosmetic, food and other industries, paper box vertical automatic forming packaging.

This machine can be equipped with automatic instruction manual, hot melt glue spraying and sealing, production date and batch number printing.

Features:

- The machine is specially designed for packing cartons with many sizes and small lots for manufacturers.
- Low cost and small footprint. Suitable for various sizes of boxes.
- This machine is a kind of vertical type automatic cartoning machine with multi-function, short time to change the specification to change the mold.
- The main material of the whole machine is 304 stainless steel and self-lubricating and wear-resistant engineering plastic.
- Advanced PLC control system combined with touch screen control panel can easily set and change the packaging parameters. The imported electrical configuration makes this equipment more stable.
- This equipment is mainly applied to cartons that need to be formed by spraying glue. The glue spraying machine is made of imported American brand, which is durable.

Technical Parameters:

Model	BCLZ50-02
Cartoning speed	10~40box/min
Maximum size of cardboard box	L:200mm W:80mm H:80mm
Minimum size of cardboard box	L:60mm W:20mm H:20 mm
Paper box paper quality requirements	250~350g/m3
Power	1.5KW
Power supply	110/220V 50/60HZ
Noise	≤70dB
Gas Source	0.5~0.8 Mpa
Gas consumption	150L/min
Dimension	L:1600mm W:1500mm H:1900 mm
Machine weight	900Kg
