

## ***Electric Liquid Packing Machine SMBJ-500***

Automatic Liquid packaging machine adopt high quality 304 stainless steel material, has a good polishing performance, big appearance quality, resistance to corrosion, heat resistance. Comply with the Drug GMP/Food QS regulatory requirements. easy cleaning, not easy to breed bacteria, can solve the sanitary problems in the production process, the machine can be widely used in packing liquid such as oil, milk, vinegar, water, juice, beverage and so on. widely used for food, beverage and pharmaceuticals industries etc.

### **Features:**

1. All stainless steel exterior. The touched packing materials is stainless steel 304. Comply with the Drug GMP/Food QS regulatory requirements. Food grade and energy saving.
2. Advanced temperature controller. All functions are key operation, LCD diaplay,
3. Intelligent control, it can do automatic packing, sealing more precise and fast speed.
4. Can packing different kinds of low viscosity liquid.
5. Divided design, high efficiency, low noise and running smoothly.
6. Easy to operate, packing weight can be set directly on display panel.
7. Film roller material: plastic film roll, paper roll, aluminum film roll, and other compound materials which can be heat sealing is ok.
8. Can do automatic bag making, electric eye tracking measuring, filling, sealing and cutting in one process etc.

## Specification

Model	SMBJ-500
Packing speed	20-30 sachet/minute
Packing range	2-100ml
Packing Accurcy	±0.1-0.3ml
Bag width	Max10 cm(can be customized)
Bag Lenght	3-16cm (adjustable)
Voltage	220V/110V 50/60HZ
Dimensions	45*40*105cm
Weight	58kg
