

High Speed Multi-function Small Bag Packing Machine

High Speed Multi-function Small Bag Packing Machine can link with multi-head weigher, powder screw conveyor, rotor pump or other many kinds of measuring machine to pack granule, powder or liquid in small bag. Speed can reach 150 bag/min, with 4 servo control.

Features

1. Using 4 servo controlling system, more stable operation, more accurate running, and more efficient
2. The whole machine adopts 3mm&5mm thick stainless steel sheet metal processing and assembly, making it more stable. And the packing speed is fast due to the core components by special optimization design.
3. Pulling and releasing belt by servo drive, make it more accurate.
4. It can be matched with combined scale, auger filler, volumetric cup and pump to achieve accurate and efficient measurement. (The above functions have been included in the standard program of packaging machine.)
5. The equipment accessories adopt electrical components with famous brand both domestic and international and ensure more stable and durable performance through years of market tests.

Technical Parameters:

Packing Speed	40~100~150 bags/min
Film Width/mm	200-420mm
Bag Width/mm	50~200
Bag Length/mm	50~300
Vertical Seal Width/mm	10~15
Film Material	Laminated Film
Bag Style	Pillow bag, Guesset bag, Punching Bag
Materials	SUS304
Dimension/mm	1650×1030×1420 mm
Air consumption	0.6Mpa 0.4m³/h
Power	4.9kW 220V 50Hz
Gross Weight	280kg
