

DC-228-180 Horizontal Fully Automatic Three- and Four-Side Seal Packaging Machine

This machine uses PLC control, with precise bag-making dimensions and high metering accuracy. The machine runs smoothly and is more suitable for 24-hour continuous operation. The filling method is flexible, with options such as screw, cup, seagull, and piston, suitable for various materials. It can achieve various international standard sealing methods.

The packaging process is intuitive and easy to learn, with convenient and quick size adjustments, allowing for switching between three-side and four-side sealing. The packaged products have a neat and beautiful appearance, high sealing strength, and a long shelf life. The machine is versatile and aesthetically pleasing.

Technical Parameters

Model	Available Bag Width	Available Bag Length	Filling Capacity	Packaging Speed (varies depending on materials and packaging)	Applicable Materials
DC-228-110	50-110mm	50-130mm	2.5-60g(ml)	45-80 bags/minute (pcs/min)	Liquid, viscous, powder, granular
DC-228-150	70-150mm	100-200mm	5-280g(ml)	40-80 bags/minute (pcs/min)	
DC-228-180	85-180mm	100-225mm	5-400g(ml)	40-80 bags/minute (pcs/min)
