

## *XT-FJ60 Automatic Rotary Ground Pepper Powder Filling Machine*

### **Features:**

This machine has reasonable design, easy and convenient in changing product and cleaning the machine. Packing weight can be stepless adjusted, automatic alarms when fault happens. Adopts PLC control, anti-interference and stable operation, can realize filling, cap loading and capping automatically without human contact. It is widely used in food, pharmaceutical, chemical and scientific industry, etc.

Applicable to pesticides, veterinary drug, premix, additive, milk powder, starch, condiment, fodder, nutrition powder, washing powder, black sesame seed powder, coffee powder, penicillin powder, bingpeng powder, collagen, flour, dye, etc powder, granular quantitative packaging.

- This filling machine is integrated with machine, electricity, photoelectric, automatic quantitative, automatic filling, automatic counting error, automatic cap loading and automatic screw capping.
- PLC control, Chinese and English touch screen language, suitable for different customer using habit, easy operation.
- High filling precision, adopts spiral material drop and servo measuring system.
- Suitable for can, bottle type powder quantitative filling.
- Full automatic in whole process, no need human contact.
- The part which contact with filling material is adopt GMP requirement material.
- Transparent material hopper, material state can be easily seen.
- The capping head can be changed to suitable for different kind of bottles.

- PLC touch screen control system, Chinese and English interface, easy and convenient to operate.

**Technical Parameters:**

Model	XT-FJ60 powder filling and capping machine
Filling material	Flour, powder which has fluidity
Filling type	Auger filling
Filling head	12 nozzles
Filling speed	60-80 bottles/min
Hopper volume	40L(standard)
Power	1390W
Voltage	AC 380V
Weight	600KG
Dimension	2000*1050*1800(L*W*H)
