

Automatic Tube Filling & Sealing Machinery K600-M

Machine Advantage

The machine model is very economical and Practical machine model. Advantage function of K600-M is automatic sensor I-Mark point, automatic filling and folding, thus rapidly it becomes the best choice of glue industry. Machine possess GMP standard mechanism designing process, the operator can easily adjust changeover for different tube diameter and filling volume.

Machine Specification

Production 60 tubes/min ; according to filling volume and mass specifications

Tube Diameter $\phi 10 \sim 25$ mm

Tube length 45 ~ 135 mm

Filling volume 1.0 ~ 8 g

Electrical Requirements 1HP (0.75kw)

Machine Weight Net.250kg / Gr.350kg

Crated Dimensions 1.2(L) x 0.8(W) x 1.7(H)

Applicable Coverage

Pharmaceutical Ointments, Hair Color Cream...

Cosmetics Cream...

Chemical Toothpaste, Glue, Silicone...

Food Chocolate...

Tube Materials Aluminum Tubes

Filling Range Low, medium and High Viscosity Product Scopes

Type of Tube Folding
