

Automatic Vertical Cartoning Machine BsCLZ50-01

This machine is mainly applied to the vertical automatic forming and packaging of cartons in the industries of daily chemical, pharmaceutical, food, cosmetic, etc.

It can be equipped with automatic instruction manual, hot melt glue spraying and sealing, date and batch number printing.

Features:

- The equipment is specially designed for manufacturers with many sizes of packaging cartons and small batches independently.
- Low cost and small footprint. Suitable for all sizes of boxes. This machine is a kind of vertical type automatic cartoning machine with multi-function, short time to change the specification to change the mold.
- 304 stainless steel casing, adopt international famous brand electrical components, stable and reliable performance.
- Adopt mechanical overload automatic stop function to ensure the safety of man and machine.
- Automatic rejection of the packaging products lacking packaging or instructions, to ensure the quality of the packaging products.
- Automatic fault display, alarm and finished product counting functions, easy to maintain and deal with faults.
- Advanced PLC control system combined with touch screen control panel, you can easily set and change the packaging parameters.

Technical Parameters:

Model	BCLZ50-01
Cartoning speed	10~40box/min
Carton size range	MAX: L:200mm W:120mm H:120mm MIN: L:60mm W:20mm H:20 mm(Can be customized)
Paper box paper quality requirements	250~350g/m3
Instruction manual size range	L : 100~260mm W : 100~190mm
Instructions paper requirements	55~70 g/m3
Power	1.5KW
Power supply	110/220V 50/60Hz
Noise	≤70dB
Air Source	0.5~0.8Mpa
Gas consumption	126L/min
Dimension	L : 1600mm W:1500mm H:1900 mm
Machine weight	800Kg
