

B-GFN-30-1 Heating Filling Sealing Machine

The B•GFN-30-1 inner-heating filling and sealing machine is use for automatically filling, sealing and pressing dates or product number and cutting the end. It applies to many industries, such as daily cosmetic, medicine and food industries.

Characteristics:

1. With efficient heater and stable flow meter imported from Germany, the reliable thermo-air heating system enables the firm sealing and high efficient.
2. This filling sealing machine uses touch screen, and PLC control, making the operation easily.
3. the big advantage of this machine is that it can match different filling nozzles, meeting the needs of various thickness.

Technical Parameters:

Power supply	380(220)V/50Hz		
Air source	0.6-0.8MPa		
Air consume	<0.6m ³ /min		
Filling quantity	10-50ml	50-100ml	100-200ml
Dosage precision	≤±5%	≤±3%	≤±2%
Production speed	25-30 pcs/min		
Tube diameters sealed	φ16-φ50mm		
Dimensions(L×W×H)	1600×1090×1500mm		
Weight(kg)	300kg
