

Pe Film Automatic Complete Column Shrink Packaging Machines

PE film automatic complete series shrinkage packaging machine is suitable for a variety of large bottles, cans, glass bottles, beer, drinking water, mineral water, soy sauce, wine and other bottled products of the bottomless heat shrinkage packaging shrinkage together. Using three-feed type, material feeding can choose single row, double row and three row, packaging items automatically cystic film according to customer demand.

Making, heat shrinkage, cooling stereotypes, a full set of action all in one machine synthesis, a full set of equipment uses German advanced technology in accordance with European technology production, electrical and pneumatic components using foreign well-known brands, transmission speed, beautiful shrinkage effect, products after packaging with a clean appearance, compact, to ensure the quality of goods and long-distance transportation needs.

Technical parameters:

Packaging speed	8-18pcs/min
Power supply, power	1φ/220v/50hz/2kw
height/length	850±50mm/1500mm
Maximum packaging size	L600xw300xh300mm
Net weight	600kg
Appearance size	l3840xw1000xh1950mm
Sealing time/Shrinkage time/ temperature	0.5-1.5s/0-0.6s/0-250°C
Paging film width/thickness max	600mm/0.04~0.12mm
