

JF-2 Aluminum Foil Induction Sealer

JF-2 Aluminum Foil Induction Sealer is new generation production which adopts electromagnetic induction technical. The machine is economical and easy to operate. It uses widely in food, beverage, pharmaceuticals and chemical industry etc. JF-2 Aluminum Foil Induction Sealer can seal the container with aluminum foil at speeds up to 120 cpm.

Features:

- Sealing speed up to 120 CPM
- Heavy duty structure
- Auto stop and alarm when lack of water
- Stable operation and low noise
- Automatic cap rejection without aluminum foil

Technical Parameters:

| | |
|------------------------|--------------------|
| Model | JF-2 |
| Sealing speed | 50-200 bottles/min |
| Diameter of bottleneck | 20-60mm |
| Height of bottle | 40-240mm |
| Power supply | 220V, 50-60HZ |
| Power | 220V |
| Dimensions | 1600×800×1160 mm |
| Weight | 180kg |
