

MIC 18-6 Beer Canning Equipment

MIC 18-6 beer canning equipment adopts isobaric pressure filling system which is applicable for beer (Cold filling temperature at 0-4 degrees Celsius)

Features:

1. Mic 18-6 beer canning equipment is in the digestion and absorption of advanced foreign and domestic sealing machine on the basis of independent development of the can filling, sealing unit. Filling and seaming part is the overall designed, in order to ensure that both the absolute synchronization and coordination.
2. The machine adopts PLC, frequency converter, human machine interface controlling system, having the advanced controlling technologies, such as frequency control, no can no filling and so on.
3. It has the characteristics of filling reposefully, high speed, liquid level control, capping reliably, frequency conversion timing, less material loss. It can equip CIP system according to the customers' request. It is the preferred equipment for the small brewery and medium beverage plant
4. The main electric and pneumatic components of the machine are famous imported brands, and it also can be disposed according to client's requirements.

Parameters

Power	2.5Kw
Filling heads	18piece
Sealing heads	6piece
Production capacity	3000-6000 CPH based on 330ml
Filling temperature	0-4 °C
Filling pressure	Max 5bar/0.5Mpa
Can diameter range	Φ40-90mm
Can height	92-168mm
Dimension	2300*1700*1950mm
Weight	2500Kg
