

XT-DSL Two Heads Milk Powder Protein Powder Filling Machine

Versatility: Linear filling machine can adapt to a variety of specifications of bottle type, convenient adjustment, maintenance-free design, makes it in the chemical industry, medicine and other fields of corrosive material filling performance. In addition, can also be optional bottle washing, capping, labeling, inkjet printing, packaging, sealing and other functions, constitutes the unmanned filling linkage production line.

Stability: The use of high quality pneumatic components and electronic control components, such as Germany FESTO, Taiwan AirTac pneumatic components and Taiwan Delta electronic control components, to ensure the stable operation and long durability of the equipment.

Applicability: Linear filling machine is suitable for a variety of specifications of bottle type, convenient adjustment, can meet different production needs, improve production flexibility.

Durability: The equipment frame is made of high quality 304 stainless steel, and powder material contact parts are made of 316L stainless steel, durable, can adapt to a variety of chemical, medicine and other corrosive material filling.

Technical Parameters

Model	XT-DSL-2
Filling Speed	1000-3600BPH
Bottle Volume	100-500g 10-100g
Bottle material	Plastic,Glass
Air Supply	0.4-0.6MPA
Power Supply	AC380V 50HZ 3KW
Machine Size	2500x1400x2200mm 400KG
