

## *AC-80 Automatic Capping Machine (single head)*

The container cap closing processor is capable to be applied for both plastic screw caps and ROPP sealing caps in one machine by changing capping system components. Capping system is designed with mechanical torque limit device to prevent over capping which damages the cap appearance.

### **Specification**

Model	AC-80 Automatic Capping machine
Cap type	Vial AL cap, AL ROPP cap, Plastic screw-on cap, Snap-on cap
Working Capacity	30-60 bottles/min
Power Consumption	220V single phase, 50/60HZ
Air Consumption	5L/min @ 6 Bars
Machine Dimensions (LxWxH)	2200x1033x1790 (mm)
Machine Weight	500KGS
